Printing Guidance

All pages contained within this PDF are in A4 paper size and in the 'portrait' orientation. We recommend that you use [Adobe Reader](#) to open our materials. The image below is of the Adobe Reader printing dialogue window presented to you when printing.

We are not able to offer support with troubleshooting individual printer settings as there are a significant number of printers on the market. This page offers **suggested** printer settings but does not outline the selection of a printer, number of pages to print, advanced printer settings etc.

Suggested Printer Settings

1. As these materials are in black and white we suggest that you **'Print in grayscale'**
2. Under Page Sizing & Handling please select **'Fit'** to make sure that the whole page prints – if this is not selected some printers will cut off the sides and/or top/bottom of the pages
3. Under Orientation please select the **'Portrait'** option
