

OUR VISION

Easterseals Colorado's Neurological Rehabilitation Adult Day Program (NRADP) provides an environment where participants can improve their quality of life by maximizing functional abilities, focusing on self-expression, and increasing independence.

We believe in providing professional guidance and encouragement, with dignity, compassion, and respect, so participants may achieve personal goals.

“WELCOME TO HOPE”

Easterseals Colorado’s Neurological Rehabilitation Adult Day Program (NRADP) is the next step for individuals recovering from a stroke or living with the challenges posed by other neurological disorders. A large array of services beyond inpatient/outpatient therapies and home care are offered as we strive to meet the physical, psychological, and social needs of our participants.

Easterseals has built a fabulous staff that is patient and inspires me. We focus on learning, healing, and growing.
James, Stroke Survivor

BENEFITS INCLUDE

- Continuing to build strength and endurance
- Adapting life skills for independent living
- Improving cognitive abilities and developing compensatory strategies
- Providing a resource and support network for participants and their caregivers
- Developing skills that lead to employment
