Fee Information Sheet for Assistive Technology Services

Assistive Technology services listed below are provided by assistive technology specialists, which are licensed with the state of Illinois and certified by their corresponding national organizations.

Assistive Technology Evaluation/Augmentative Communication Evaluation:

\$275.00/hr

**duration varies 1-4 hrs*

The purpose of the evaluation is as follows:

- Determine what types/forms of assistive technology are appropriate for the individual.
- Provide individuals and their families, as well as the referral sources, suggestions on usage and implementation.

A team of therapists specially trained in assistive technology administers the evaluation. The multidisciplinary evaluation is composed of a speech-language pathologist and an occupational therapist. Referral for the evaluation can come from a physician, therapist, family member, school or any other involved person. A written report is generated and the cost for this is included in the evaluation fee.

Assistive Technology/Augmentative Communication Consultation:

\$180.00/hr

**plus travel fee if offsite*

The purpose of the consultation is to provide assistive/augmentative application support. A consultation occurs upon a referral from a therapist, school, physician, or other involved person. A brief written note is generated. Consultation rates contracted over 3 hours may be negotiated.

Inservicing:

\$180.00/hr

**plus travel fee if offsite*

Presentations to school staff, other professionals, and families regarding assistive technology device systems, software, etc. Contracts need to be obtained prior to date of service.

School Staffing:

\$180.00/hr

**plus travel fee if offsite*

Service includes attendance at appropriate multidisciplinary conferences in order to relay information, determine progress, assist in goal determination and detail progression of treatment. This may also be necessary to provide accurate interpretation of the evaluation/consultation or intervention information.

Assistive Technology/Augmentative Communication Intervention Sessions:

\$180.00/hr

Services include intervention and treatment utilizing speech generating systems and/or computer technology with modifications for training and diagnostics. These sessions allow development, drill, practice, repetition and challenge in skills in the following areas: cognition, articulation, language, sequencing, memory, problem solving, pragmatics, and motoric access to technology options as appropriate to the individual being served. Sessions are 45 minutes in length, one time a week as scheduling allows.

Customization/Modification/Fabrication:

\$180.00/hr

Services include creation or development of manual communication systems, customization or modifications of speech output systems and computer systems.

iPad, iPod Touch Consultation/Training**:

\$33.75/per 15 minutes of service

***self pay only at time of service*

Services include assisting in determination of appropriate apps for usage for an individual, customizing and modification of apps and training skills in operation of iPads/iPod Touch systems and related apps.

***Travel Fee- \$35.00 per each 45 minutes of travel time involved for offsite services**
