

When I arrive at Easterseals, I will wear a mask, get my temperature checked and my parent answers questions.

There will only be a few people in the lobby. I will be greeted by my audiologist.

I will have my own special chair and sit next to my Mom or Dad in the sound room or on their lap.

I might listen to fun sounds wearing headphones.

A special flashlight might go next to my ears to help the audiologist see better.

When we are ready to go home, we wash our hands in the sink. This helps keep us safe and healthy.

1

We will wash our hands when we get to the hearing testing room.

2

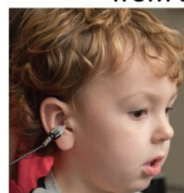

My Audiologist will be wearing a mask and sometimes a face shield. This helps keep everyone safe.

3

Sometimes my ears will get to hear sounds from a squishy earphone in my ear.

4

Toys will light up around the room when I play the sound game.
