OUR PURPOSE & MISSION: To lead the way to 100% equity, inclusion, and access for people with disabilities, families and communities by enriching education, enhancing health, expanding employment, and elevating community.

Autism Services

Autism spectrum disorder (ASD) is a neurodevelopmental disorder that begins in early childhood and affects how people interact with others, communicate, learn, and behave. According to the CDC, 1 in 36 children in the U.S. have Autism, up from the previous rate of 1 in 44. 1 in 45 adults in the U.S. have Autism. In the U.S., about 4 in 100 boys and 1 in 100 girls have Autism.

Easterseals, Inc. is the country's leading provider of services for people with Autism.

We offer services to assess, diagnose, treat, and support children, young adults, and their families who are struggling with understanding and managing behaviors. Effective treatment of the challenging behaviors associated with Autism requires multi-provider involvement, better understanding and support, and focused parental education. The collaboration of all parties involved helps to ensure that the individual's plan of care is consistent across different environments.

For more information or to get started with our autism services, please contact us at 860-270-0600 x100 or medrehab@escrec.org.

Programs & Services include:

PEERS

PEERS®, Program for the Education and Enrichment of Relationship Skills, was created by UCLA and uses evidence-based social skills training intervention. Social skills are taught through didactic lessons, role-play demonstrations, and practicing skills during group activities.

Neuropsychology

Neuropsychology services can assist with:

- assessment and diagnosis of ASD
- providing a framework for understanding of the complex behaviors associated with ASD
- offering a blueprint of treatment recommendations, which may include academic and school accommodations, individual therapies, and social skills training

Physical Therapy

Physical therapy can:

- help develop better limb and body coordination and a more stable posture
- help build muscle strength, to increase endurance and reduce fatigue
- improve play skills

Occupational Therapy

Occupational therapy can address:

- activities of daily living such as feeding, dressing, and grooming
- sensory integration to help better process and respond to sensory stimuli
- independent living skills including complex problem-solving, money management, budgeting

Speech Therapy

Speech therapy can address:

- social pragmatics such as body language, facial expressions, and gestures
- social communication and conversational skills
- augmentative and alternative communication devices

Counseling, Therapy, and Case Management

Social services, including counseling and case management, can:

- link parents and families with resources
- provide advocacy
- support emotional identification and regulation
