OUR PURPOSE & MISSION: To lead the way to 100% equity, inclusion, and access for people with disabilities, families and communities by enriching education, enhancing health, expanding employment, and elevating community.

Dementia & Memory Services

According to the Alzheimer's Association, more than 6 million Americans are living with Alzheimer's, or other dementia.

Early diagnosis of dementia is important because it:

- provides greater access to treatment interventions
- helps people make better informed decisions about legal, financial, and future care plans
- provides individuals and their families with practical information and resources

Easterseals Capital Region & Eastern CT offers many services for individuals and their families/caregivers who have concerns related to dementia.

Quarterly dementia education series (offered in partnership with the Alzheimer's Association) for caregivers, families, and individuals with dementia. Topics for the Quarterly Dementia Education Series include:

- Understanding Alzheimer's Disease
- Effective Communication Strategies/ Understanding and Responding to Dementia Related Behaviors
- Activities of Daily Living and Community Mobility
- Coping for Caregivers

Neuropsychological services:

- Provide focused cognitive diagnostic evaluations to assist with early identification and diagnosis of dementia
- Help to clarify the cause of a person's memory and cognitive difficulties and the type of dementia a person may be experiencing
- Offer treatment recommendations and other resources that may be available

Case management services:

- Provide advocacy and support for individuals with dementia and their caregivers/families
- Connect individuals in need with available services and other resources
- Assist with completing applications for public assistance programs such as SNAP, Medicaid, Social Security Benefits, and other programs.

Speech therapy services:

- Provide strategies to help with language and communication difficulties
- Address eating, drinking, and/or swallowing difficulties
- Identify strategies to help with memory and processing difficulties

Occupational therapy services:

- Address difficulty with dressing, bathing, toileting, cooking, and other activities of daily living
- Work to reduce challenges associated with coordination difficulties, weakness, and limited movement
- Identify strategies to help with attention, memory, and executive functioning

Physical therapy services:

- Reduce muscle stiffness and pain
- Help improve muscle strength and endurance
- Address balance and gait (walking) difficulties

Fall screenings:

- Performed by our physical and occupational therapists
- Assess person's risk of falling
- Offer strategies to prevent falls and reduce injury
