Bill McAnally Racing By Jan Sumka

Don took a class of students to Bill McAnally's garage in Roseville where they were so nice to all of us. The Napa Racing team gave us hats, to make our visit official. Plus they had amazing hot racing cars, plus Bill took a picture with me and then with took a picture with a group. And then gave everyone postcards. To keep in contact with favorite drivers so thank you so much for Having us I hope we our inivited back again soon. It was fun for everyone. We all enjoy it very much.

Jan Sumka

DISC GOLF

Disc Golf is one of our most popular outings. The clients get to practice putting around the golf course. The clients enjoy the sport so much that they have purchased their own discs to use and take pride in. The community has embraced the clients and friendships have been made. They have played several rounds as well as donated discs to the clients as well. Disc golf has been added to the calendar 8 times a month because it fills up quick and everyone wants to join.

We have gotten the opportunity to attend the test and tune for both the NITRO NIGHT OF FIRE (June 16th) and the 48TH ANNUAL GOVENORS CUP (Sept 21rst) at SACRAMENTO RACEWAY.

Don and Dianne had arranged with Cindy at the track to come see practice sessions the Friday before each event. It was very exciting. Many of our clients have never experienced a drag race and to see top rated racers hit the quarter mile was an unforgettable and very loud, ground shaking event. Hitting speeds of over 200 MOH!

Our Thanks go out to Sac Raceway for their hospitality.

California Auto Museum

Well another exciting year has passed in our visits to California Auto Museum. Malcolm Forbe's green lamborghini to Jerryn Brown's Plymouth and Linda Ronstadt's Porche. Even something for our Back to the Future fans. Our 15+ year relationship

YOLO BYPASS NATURE AREA

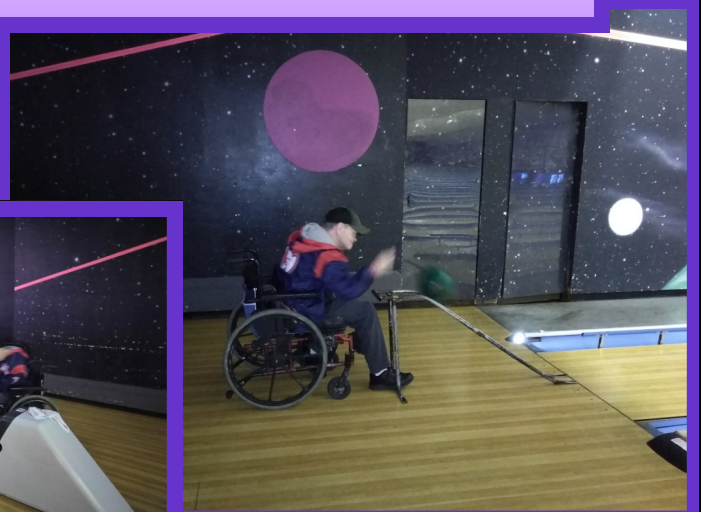

Today our clients enjoyed a beautiful day at the Yolo Bypass Wildlife Area. There they observed a variety of waterfowl, shorebirds, and wading birds. Clients also enjoyed the vegetation community types including managed seasonal and permanent wetland, natural seasonal wetland, natural perennial wetland, and riparian woodland. Clients also enjoyed the 45 minute bus ride to the habitat, giving them time to reflect on the natural wonders they would encounter.

The day was so nice that the clients had a chance to enjoy an outside lunch, while reflecting on each individual's experience.

BOWLING!

We Love Bowling!

We try to go at least once a week. I wonder if we could put together a little competition between programs one day.
Don

SEWING CLASS

In sewing Patricia made a scarf for the cold winter months. She gets so excited when she makes something. Her pride brings joy to us all. Elsa made a rice pack to warm in the microwave for the winter months. And Kelly has been working on a quilt for a few months and is so excited to have gotten this far. She is beaming with pride about her beautiful purple quilt, and can't wait to show her mother. Other clients are also working on quilts as well.
