

March 17, 2020

Dear Easterseals Families:

The Easterseals team continues to monitor the evolving COVID-19 situation, and the health and well-being of our families and staff remains our top priority.

Our team has been closely monitoring announcements, executive orders and guidance from state and local governments as this unprecedented public health emergency continues to evolve. At this time, **all of the Easterseals Child Development Centers will remain closed through Friday, March 20th**. This will give us time to monitor, clarify and evaluate guidance from state governments, Departments of Health and our licensing offices to ensure that all future decisions about center operations adhere to their guidance while protecting the families we serve, our staff and the broader community.

We will provide you all with an update on the status of our center operations on Friday, March 20th. In the meantime, **please let your center director know if you will need childcare if we reopen the centers next week**. This will help us plan for appropriate staffing and resources if we reopen.

Thank you for your support and understanding as we all work together during this unprecedented time. You and your children are important and valued members of the Easterseals community.

Stay safe,

Tara Phillips
Senior Director, Child Development Operations
