

Early Intervention

For over 50 years, Easterseals Central and Southeast Ohio has been providing Early Intervention services to help young children with or at-risk for developmental delays, disabilities and autism achieve their goals in cognitive, social/emotional, communicative, adaptive and physical development. Early intervention services have proven to be crucial to the healthy development of infants and toddlers with disabilities, minimizing their potential for developmental delay. Research shows the earlier intervention occurs in a child's life, the more success that child will experience.

Easterseals is a home based early intervention program with access to group oriented, facility based curricula for children 12-36 months of age. Our Early Intervention program focuses on a child's needs early-on in their development at their individual level of ability, giving them the head start they need to keep up with their peers. An individualized plan is developed for each child and their family, outlining goals to be focused on with their team.

HIGHLIGHTS INCLUDE:

- In-Home Visits
- Creative Center Based Curriculum
- Classroom Based Therapies
- Daily use of our inside and outside accessible play areas
- Music Therapy
- Transportation

Classroom size is limited to eight children with one certified early intervention specialist and teacher's assistant per classroom. Students work with trained physical, occupational and speech therapists.
