

The Easterseals Colorado Affiliate Network (ESCAN) is a network of organizations that have come together as a collaborative effort to better serve people living with disabilities.

Vision: A reimagined disability service system that seamlessly connects people with disabilities to customized, high-quality services.

To reach our vision, ESCAN is:

- Building a coalition of organizations that serve people with disabilities.
- Creating a shared, centralized database with the power to match people with disabilities to the programs that best meet their needs.
- Facilitating conversations on alternatives to the current disability service system.
- Increasing the capacity of small disability service organizations throughout the state.
